PROFESSIONAL SUMMARY

Security System Engineer with 3+ years of hands-on experience delivering enterprise-grade security infrastructure for high-profile clients. Skilled in end-to-end project execution — from site survey and architecture design to installation, commissioning, and user training — with a strong foundation in network engineering and a growing track record in IoT R&D.

WORK EXPERIENCE

Security System Engineer PT. Lumba Karya Asia

2023 – Present | Full Time

- Designed security system architectures based on client operational needs and site survey findings.
- Developed BoQ, technical specifications, and procurement documentation for 6+ enterprise projects.
- Installed and configured 200+ IP cameras, access control devices, and NVR/DVR systems to spec.
- Led testing, commissioning, and QC across multi-site deployments; maintained zero critical defect rate.
- Delivered technical training and knowledge transfer to end users and facility management teams.

HIGHLIGHT PROJECTS

Soekarno-Hatta Airport — Access Control

2025 • Airport Infrastructure • Access Control • Centralized Architecture

Designed and deployed a centralized access control system covering 26 doors at Kalayang Depot. Handled end-to-end execution including architecture design, device-to-server configuration, testing, commissioning, and operational training for aviation security teams.

Minister of Finance — Private Office Network & CCTV

2024 • Government • Network • CCTV • Ubiquiti UniFi

Delivered complete network and security infrastructure for the private office of the Minister of Finance. Configured UniFi router, switches, and 22 access points; installed 28 IP cameras — end-to-end from planning to commissioning.

Denpasar Residence — Access Control Lift Integration

2025 • Access Control • Lift Integration

Full-cycle installation of access servers, door devices, and elevator integration; commissioning and specialized user training.

Smart IoT Monitoring — Indosat Ooredoo

2026 • IoT R&D • Ongoing

R&D project to monitor 22 water gallons and 54 toilets across Indosat Ooredoo premises. Handled hardware selection, system architecture, and firmware development. Pilot unit (1 gallon + 1 toilet, 2nd floor) successfully deployed; full rollout in progress.

SKILLS & TECHNOLOGIES

Security Systems

CCTV (IP/Analog), Access Control, NVR/DVR Setup, Biometrics, Alarm Systems, System Commissioning, Preventive & Corrective Maintenance, BoQ Development

Network Engineering

TCP/IP, LAN/WAN Design, IP Addressing & Subnetting, Routing & Switching, Wireless Networks, Firewall, Network Monitoring

IoT & Hardware

Microcontrollers, Sensors Integration, Firmware Development, Hardware Prototyping

Tools

Suprema Biostar2, Hikcentral, IVMS, SADP, Dahua ConfigTool, Wireshark, Unifi, Juniper, ZeroTier, Putty, Linux OS

EDUCATION

Universitas Pamulang

S1 Teknik Informatika • 2018–2025

SMK Yadika 12 Depok

Teknik Komputer Jaringan • 2015–2018

CERTIFICATION

Network Administrator — BNSP

Technical & Products – Suprema
